## Overview

The **CN 19 U** is suitable for differential voltage tests according to IEC / EC 61000-4-19. It is designed for tests in the frequency range from 2 kHz to 150 kHz.

The current transformer **CN 19 I** is used to supplement tests according to the IEC / EC 61000-4-19 standard and is also suitable for a frequency range from 2 kHz to 150 kHz.

## Technical data

| CN 19 U Coupling network          |   |
|-----------------------------------|---|
| Frequency range                   | 2 kHz - 150 kHz   |
| Level                             | 0 - 25 Vrms cont  |
| Source impedance                  | $10 \Omega \pm 3 \Omega$ max.<br>( $\pm 1 \Omega$ typ.) |
| EUT voltage                       | 500 V AC (50/60 Hz),<br>700 V DC                        |
| Max. EUT current                  | 16 A cont. AC/DC  |
| Voltage drop mains EUT            | 13 V typ.<br>(16 A/50 Hz)                               |
| Amplifier input                   | XLR socket  |
| Mains / EUT                       | 4 mm safety jacks<br>(black/blue)                       |
| High voltage test amplifier - EUT | 1,9 kV DC (10 sec)                                      |
| Size                              | 15,7 x 48,2 x 54 cm                                     |
| Weight                            | 11,2 kg   |
| Temperature range                 | 5 - 40 °C   |

## CN 19 I Current transformer

| CN 19 I Current transformer                  |  |
|--|--|
| Frequency range                              | 2 kHz - 150 kHz  |
| Level  | 0 - 10 Arms cont.  |
| Source impedance                             | $1 \Omega \pm 0,3 \Omega$ max.<br>( $\pm 0,1 \Omega$ typ.) |
| Four-wire shunt                              | $0,1 \Omega \pm 1 \text{ m}\Omega$ max.                    |
| EUT voltage                                  | 500 V AC (50/60 Hz),<br>700 V DC                           |
| Amplifier input                              | XLR socket   |
| EUT current output                           | 4 mm safety jacks<br>(black/blue)                          |
| Shunt output                                 | 4 mm safety jacks<br>(green)                               |
| Power supply                                 | external 24 V/1 A AC/DC power supply unit                  |
| High voltage test amplifier - current output | 1,9 kV DC (10 sec)   |
